PROJECTS

Project Name: Recommendation System for Higher Studies.

Role: Developer	**Team Size:** 3	**Project Duration:** 3 Month
Project Detail	I created a web-based project with a team. Our project was based on a recommendation system, where the user feeds his or her marks and gets the best possible college list from the app. And it also provided the details for the scholarship that the students can avail for Higher Studies.	

Project Name: COVID-19 notification

Role: Developer	**Team Size:** 3	**Project Duration:** 3 Month
Project Detail	We make a notifier for active COVID cases and how many people get vaccinated.	

Project Name: Human action detection and recognition using image processing

Role: Developer	**Team Size:** 3	**Project Duration:** 3 Month
Project Detail	Our project is based on human action detection, and also it detects the bed patients. The patient who is in bed in that condition our Algorithm will detect the moment of patients.
